## SUMMARY

I am a student with a strong passion for coding and problem-solving. I have experience with programming languages like Java, Python, and JavaScript, and am eager to apply my skills in real-world scenarios. I enjoy working in teams, continuously learning, and improving my programming abilities. I am looking for an internship where I can grow professionally and contribute to exciting and impactful projects.

## PROJECTS

### Smart bottle recycling cabinet

Develop a smart bottle recycling system that uses image processing technology to detect and classify PET bottles with features that connect to complete work

- Trained a model for integration with the program, using image processing algorithms to accurately classify PET bottles
- Designed and developed a Graphical User Interface (GUI) for real-time data display
- Stored transaction data in the database and sent detailed transaction information through the LINE application
- Enhanced user convenience by implementing a points redemption system through the website, with notifications sent via LINE for each redemption
